

The Reality

In 2017, over 12,000 abortions in Massachusetts occurred before 8 weeks of pregnancy.

Too many women are making a hasty decision to abort based upon fear rather than truth. This life-changing decision requires medically accurate information about the risks associated with abortion, along with life-affirming counseling on parenting and adoption.

Your Options Medical provides these services and as a medically licensed organization, offers free pregnancy testing and ultrasounds (as early as 6 weeks) to women facing unplanned pregnancies. Patients also receive an opportunity to learn of Jesus' love for them, and ongoing mentoring and support.

When mothers considering abortion view their babies through ultrasound, over 60% of the time, they choose LIFE!

Emily's Story

Emily arrived at Your Options Medical for a pregnancy test and ultrasound. Due to work and school demands, she stated that this was not a good time for her and her boyfriend to have a baby. They both believed that abortion was the right choice. However, when Emily saw the beating heart of her 11 week old baby during the ultrasound, she turned to her boyfriend and said "It looks like we are going to have a baby." The idea of abortion was eliminated as soon as the couple saw their baby.
