PATIENT STORY

“We just aren’t ready to be parents right now.”

Natalie and Nicholas were not expecting to be pregnant. They thought they took the right precautions to avoid a pregnancy, but the pregnancy test turned out to be positive. Feeling shocked and unprepared, the couple stated that abortion was the right choice for them.

They were a very sweet couple who obviously cared deeply for each other and their reasons for seeking an abortion seemed valid to them. Both of them were away from their families who lived in another country. Natalie could not imagine trying to raise a baby without the support of her mother and extended family, especially when she had no health insurance. Likewise, Nicholas worried about being a father while working two jobs in order to send money home to his family. To them, it made sense to put off having a family until they were married, financially stable, and able to bring Natalie’s mother to Massachusetts.

Then Natalie had her ultrasound. What the couple saw deeply impacted them: not one, but two tiny heartbeats. Natalie sobbed in Nicholas’ arms – she never expected to see twins. She was not prepared to see her babies’ hearts beating already at less than 7 weeks old. Every reason they had for having an abortion was now in question.

Another appointment was set up for them and when they returned for a second ultrasound, they decided to continue with the pregnancy. The joy they experienced during this visit was so amazing to witness.

We worked with the couple to help Natalie sign up for health insurance and find a doctor and other support services. Throughout the pregnancy, we kept in touch and anticipated the birth of their babies with them.

And on New Year’s Eve 2020, two precious baby boys were born.

This is just one of the hundreds of stories you make possible every year through your support of Your Options Medical.

FROM THE EXECUTIVE DIRECTOR

Teresa Larkin

One of the most common responses we hear from women when asked why they are considering abortion is, "It's just not a good time." This often means, "I am no longer in control of my life." Like Natalie and Nicholas, fear of the unknown is what so often compels women and couples to pursue abortion.

If 2020 taught us anything, it showed us how little control we actually have over our lives. Rules and regulations that were unfamiliar forced us to live one day at a time – the way that Jesus teaches us to live. We all felt fear and uncertainty at one point, if not many times, over the last year. This experience actually gave me immense empathy for what a woman facing an unplanned pregnancy must feel like.

Many of the women we serve face financial challenges, unstable relationships, and poor employment prospects - sometimes, all three. They can't imagine their situation improving, especially if they bring a baby into the world. What these women need most is hope. Hope in a better future, a brighter tomorrow, and that their situation will eventually improve. Having survived a global pandemic, can you relate?

While our medical services and counseling are a first step in helping women see the truth about the decision they are making, how we treat them, how we interact with them, the support we provide for them in overcoming the fear of the unknown as a new mother are what sets us apart. It is Christ in us – the Hope of Glory.

And as our friends and supporters, you give more than your earthly treasure, you give us hope that we are not alone in this work. Although we have been given the amazing privilege of serving these women and couples face to face, you are the army behind us. We are eternally grateful for your prayers and support over the course of 2020.

"The Lord delights in those who fear Him, who put their Hope in His unfailing love." Psalm 147:11

FROM OUR BOARD CHAIRMAN, PAULLINEHAN

Words can't express our heartfelt thanks for your partnership in 2020. As one of the only medically-licensed pregnancy resource organizations in Massachusetts, we recognize that an ultrasound is the key to changing hearts and minds. By opening a window into a mother's womb, parents see the reality of the life that exists.

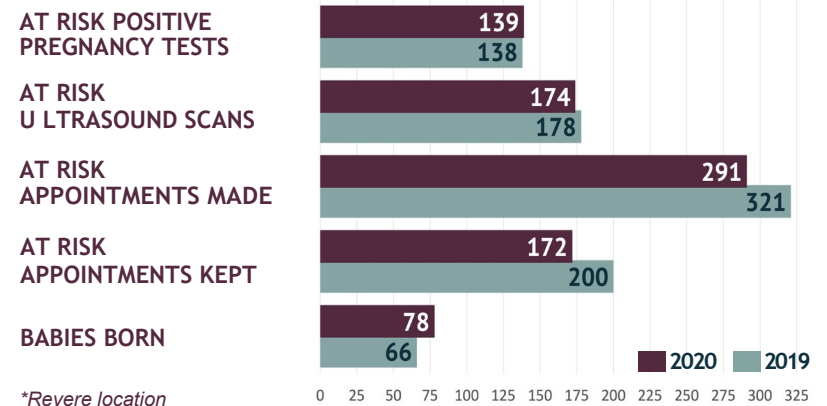

While 2020 was certainly challenging, it wasn't a year without evidence of God's faithfulness. Not only were hundreds of babies' lives saved, but we secured a new building in Brookline and will be opening our fourth location this spring in the heart of the abortion district! We can't wait to see what 2021 has in store, and we are honored to call you partners in the cause of life.

PATIENT STATISTICS

Our mission is to reach a pregnant woman who is seeking or considering abortion and to provide her with free, life-affirming care and support so she chooses life.

Impact Despite a Global Pandemic

Even in the middle of a global pandemic, Your Options Medical kept its doors open to offer in person medical services and counseling. Many women came to us distraught stating that Planned Parenthood, *who wasn't seeing patients in person*, wasn't helpful and barely even talked to them. What's even *more* amazing is that at one of our locations, we maintained the same number of patients who were at risk of having an abortion as in the previous year, which resulted in *even more babies being born than in each of the previous two years!* **Nothing is impossible with God.**

139 BABIES BORN IN 2020

1/1 Rosalee	3/3 Alejandra	5/27 Gabriela	7/4 Joseph	9/15 Cassie
1/3 Dahlia	3/4 Nain	5/31 Mariah	7/6 Aaron	9/24 Elias
