

*“We just couldn’t get the picture of our babies out of our minds.”*

During Jenny’s appointment, she stated her intention to have an abortion. She made it clear that the only reason she needed our services was to confirm how far along she was in her pregnancy.

*“I am just not ready to be a mother. Maybe in a few years, but definitely not now.”*

Her boyfriend Jake was supportive of her decision but was more open to having a baby. When the ultrasound showed nine-week-old twins, Jenny began sobbing. The reality of her decision was staring right at her and it was painful. Every reason she had for wanting an abortion seemed valid to her but she those two beating hearts shook her to the core.

**Two days later, she called to let us know that she was not going through with an abortion; the pictures of her babies changed her mind.**

The abortion industry knows the power of ultrasound in changing the hearts and minds of mothers and fathers which is why they fight so hard to deny women the opportunity to have an ultrasound. Providing the abortion pill online is another tactic that persuades women to make a quick decision and ignores the importance of in-person medical testing, including ultrasound.

Many of you contributed to our Focus on the Family Matching Gift Campaign last year that allowed us to double our monthly advertising budget. As a result of your gifts, we were able to REACH MORE Women and SAVE MORE LIVES.

**In fact, our centers saw an overall seventy-four percent increase in the number of first-time patient visits during the first quarter of this year and when the grant was awarded last Summer. And in the first four months of 2022, 70 women who were abortion minded have changed their mind and decided to continue their pregnancies!**

With the tremendous growth we are experiencing in our centers, our board members recognized that additional financial resources are needed to meet the

increase in patient volume. As a board, they have committed \$20,000 to match every gift made to the ministry from Mother's Day to Father's Day.

We invite you to join us today by sending in your gift so that a free ultrasound can be provided to another mother like Jenny who told us recently that she is so grateful that she came to our center and that she and Jake cannot wait for the birth of their twins.

*"You saved their lives and you saved mine too."*

We must do everything in our power to push back against this attempt by the abortion industry and our local lawmakers to deny women like Jenny and thousands of others the opportunity to know the truth about their pregnancy as well as the risks associated with abortion.

Your support is vital – you allow us to be the first line of defense – but every baby born, every mother we serve is because of you.

These are very challenging and uncertain times for all of us and we recognize that giving right now may be a huge sacrifice. ANY AMOUNT will make a difference.

There are also other ways that you can support this ministry: volunteering at one of our centers, serving on our board, or engaging your church in financially supporting this ministry.

God placed us here in Massachusetts for such a time as this, let's spur each other on in supporting LIFE!

In His Service with you,  
Teresa Larkin  
Executive Director
