

### A Woman's Concern, Inc. (AWC) dba Your Options Medical Centers

**Vision:** To see a day when all parents choose life for their baby.

**Mission:** **Engage** with life honoring services **Embrace** with life-saving truth **Empower** with life-changing support.

**Purpose:** To reach more women and save more lives.

#### **Calling and History:**

A Woman's Concern, Inc. was birthed in 1991 from the conviction that it is not enough to be against abortion, but that we must do everything humanly possible to help women keep their babies and parent well or lovingly release for adoption. In 1999, the ministry obtained a medical clinic license from the Massachusetts Department of Public Health which made it possible to offer lab-quality pregnancy testing and ultrasounds to women at risk for abortion. Through the years, we have operated out of different centers and communities but our core mission has never changed.

#### **Ministry Model:**

Massachusetts is one of four states that require a pregnancy center to acquire a medical clinic license or operate as a doctor's office in order to provide ultrasound services. Based on our statistics, when women who are considering an abortion view an ultrasound of their baby, they change their mind over 60% of the time. **The importance of ultrasound is therefore crucial in changing the hearts and minds of mothers** and protecting the unborn and why Your Options Medical is committed to providing this vital service.

#### **Key Distinctions:**

- Currently operates four pregnancy centers: Revere, Fall River, Brookline, Hyannis.
- The Revere center and the mobile clinic are licensed as medical clinics by the Department of Public Health. Fall River, Brookline and Hyannis operate under the license of a Board-Certified OB/GYN.
- Owns and operates the only mobile medical clinic in Massachusetts that is equipped to provide ultrasounds on a mobile platform.
- Cares for and supports women during and after pregnancy.
- Collaborates with community agencies to help meet the practical needs of women and their babies.

#### **Success Indicators:**

All Centers	2021	2022	2023	2024*
Total Visits	1458	2248	1590	1047
Total Pregnancy Tests	440	602	429	280
Total Ultrasounds	436	640	391	220
Total Spiritual Discussions	166	173	163	148
Total Babies Born	168	218	203	180

**Growth Strategies:**

- Recruit and train additional medical professionals to increase availability of ultrasound and expand medical services.
- Assess the need for future centers in other high risk abortion communities.
- Move into our new location in Southbridge, MA at The Bridge of Faith Youth Center.
- Add 24 hour hotline services on our patient website through Infinite Worth.

\*In 2024, the Commonwealth of Massachusetts in conjunction with the Department of Public Health and Reproductive Equity Now (An Abortion advocacy group) launched the multi-million-dollar tax payer funded "Smear Campaign" making a significant impact on our patient visits. We are working with the ACLJ to correct the lies that this campaign has perpetrated against our centers and pregnancy centers throughout Massachusetts.
